

PolyComp

(AAX, AU, CLAP, VST2, VST3)

produced by Luca Capozzi (Audiority Srls), February 2021

Current Manual version: v1.3

PolyComp is an analog simulation inspired by a classic VCA mastering multiband compressor.

The PolyComp is a versatile dynamic processor, providing three bands of VCA compression. Each band is an independent compressor with its own standard controls (Threshold, Ratio, Attack, Release, Gain) and a three way switch to bypass or mute each band.

You can use PolyComp as a corrective compressor on single tracks, as a mixbus compressor or as a mastering tool.

Please, read carefully both product specifications and system requirements **before** purchasing any **Audiority** product.
